

IoT Course – Assignment Submission Guidelines

Assignment Requirements

All students are required to complete and submit their IoT assignment by following the instructions below.

Step 1: Prepare the Assignment Document

- Complete all the assignment questions.
- Prepare your answers in a document format (Microsoft Word or PDF).
- Ensure your document is well-formatted, neatly presented, and free from plagiarism.
- Include the following details on the first page:
 - Student Name
 - Enrollment/Roll Number
 - Course Name: Internet of Things (IoT)
 - Assignment Title
 - Submission Date

Step 2: Upload the Assignment to GitHub

After completing the assignment, upload the following files to your GitHub repository:

1. **The completed assignment document** (PDF or Word document containing your answers).
2. **A separate file containing the assignment questions** (Each question separately, Example : Question46_Water_Level_Alert.ino).

Step 3: Repository Organization

Your GitHub repository must follow the structure below:

GitHub Profile

```
└─ Summer School
    └─ Assignment
        ├── IoT_Assignment.pdf (or .docx)
        └── IoT_Assignment_Questions.pdf
```

Step 4: Verify Your Submission

Before submitting, ensure that:

- The assignment document opens correctly.
- The assignment questions file has also been uploaded.
- Both files are present in the **Summer School** → **Assignment** folder.
- The repository is properly organized and accessible.
- The file names are clear and meaningful.

Submission Checklist

-  Completed assignment document (PDF or Word).
-  Separate file containing the assignment questions.
-  Both files uploaded to GitHub.
-  Repository structure:
 - **GitHub** → **Summer School** → **Assignment**
-  Files are correctly named and accessible.

Note: Submissions that do not include both the completed assignment document and the separate assignment questions file, or do not follow the required GitHub folder structure, may be considered incomplete.
